# Franco León Costantini

Argentina, Buenos Aires, José C. Paz | francoleonadress@gmail.com | +54 11 5717-9268 | Portfolio

Versatile IT professional with 2 years of full-stack development experience, specialized in code optimization, RESTful API development, and mobile applications. Beyond my technical achievements, I also have teaching experience in university-level programming, strengthening communication and leadership skills. I am seeking a full-time position in a company that values continuous learning, where I can contribute with my technical expertise and teamwork.

**Personal Productivity Course** 

Universidad Nacional de General Sarmiento, 2021-

presen

Universidad Nacional de General Sarmiento

CertiProf, January 2023

Egg Academy, December 2022 – May 2023

Google Active, December 2022

## **Experience**

### Backend Developer – *Innovatech Solutions*

(Jan 2023 – Sep 2024)

- Developed and maintained Java web applications (Spring Boot, Thymeleaf) with MySQL, improving system performance by 20%.
- Implemented RESTful APIs to integrate new services and extend application functionality.
- Collaborated in agile environments (Scrum) using Git for version control, ensuring iterative and high-quality deliveries.

#### Programming Instructor – Universidad Nacional General Sarmiento

(Jun 2024 – present)

- Taught Introduction to Programming and Programming Fundamentals (Python), guiding more than 150 students in acquiring technical skills.
- Designed practical material and guides with code, facilitating the understanding of data structures and algorithms.
- Developed assessments and applied activities, fostering active learning and logical thinking.

#### Full-Stack Developer - Teset (Financial Entity)

(Oct 2024 – Dec 2025)

- Developed a mobile application in React Native integrated with RESTful APIs in Spring Boot and PostgreSQL, enabling over 10,000 clients to access financial services.
- Digitalized loan processes and customer inquiries, reducing manual workload in branches by 40%.
- Optimized administrative processes using Docker and automated deployments with CI/CD pipelines, lowering operational errors by 25%.

#### Full-Stack Java Developer (Jmix) - GRÚAS SAN BLAS S.A

(Jan 2025 – Sep 2025)

- Full-stack development in Java (Jmix) with MySQL, contributing to the evolution of the core ERP used by over 400 internal users.
- Implemented key functionalities such as receipt automation, invoice generation, and scheduled processes, reducing operational costs by 15%.
- Integrated supplier, customer, and inventory modules, enhancing process traceability across the organization.
